Certification Course Details: (Attach the snapshot and briefly write the report for the same)

The today's topic is about HTML, CSS, and Javascript for Web Developers

Coding Challenges Details: (Attach the snapshot and briefly write the report for the same)

The screenshot shows a Visual Studio Code editor window with a Python file named 'Even_Odd_Number.py'. The code is as follows:

```
1 # Python program to count even  
2 # and odd numbers in a list  
3  
4 # list of numbers  
5 list1 = [10, 21, 4, 45, 66, 99, 1]  
6  
7 even_count, odd_count = 0, 0  
8  
9 # iterating each number in list  
10 for num in list1:  
11  
12     # checking condition  
13     if num % 2 == 0:  
14         even_count += 1  
15  
16     else:  
17         odd_count += 1  
18  
19 print("Even numbers in the list: ", even_count)  
20 print("Odd numbers in the list: ", odd_count)  
21
```

The question I took to code is: Given a list of numbers, write a Python program to count Even and Odd numbers in a List.
