Date:	26/06/2020		Name:	Laxman Pundalik Budihal	
Sem & Sec	4 rd sem (A sec)		USN:	4AL18CS043	
Online Test Summary					
Subject	-				
Max. Marks	-		Score	-	
Certification Course Summary					
Course	HTML, CSS, and Javascript for Web Developers				
Certificate Provider	Coursera		Duration	15 hours	
Coding Challenges					
Problem Statement Given start and end of a range, write a Python program to print all negative numbers in given range.					
Status: Completed					
Uploaded the report in GitHub			YES		
If yes Repository name			https://github.com/alvas-education-foundation/Laxman_Budihal		
Uploaded the report in slack			YES		

Certification Course Details: (Attach the snapshot and briefly write the report for the same)

The today's topic is about HTML, CSS, and Javascript for Web Developers

Coding Challenges Details: (Attach the snapshot and briefly write the report for the same)

A screenshot of a Visual Studio Code editor window. The title bar reads 'Negative Numbers - Visual Studio Code'. The editor has a dark theme. The file explorer on the left shows a folder named 'Negative Numbers' with a file 'NegativeNumbers.py'. The code editor displays the following Python code:

```
1 // Given start and end of a range, write a python program to print all negative numbers in given range.
2 start, end = -4, 10
3
4 # Iterating each number in list
5 for num in range(start, end + 1):
6
7     # checking condition
8     if num < 0:
9         print(num, end = " ")
```

The status bar at the bottom shows 'Ln 5, Col 1', 'Spaces: 4', 'UTF-8', 'Python', and the date '04/07/2020'.

The question I took to code is: Given start and end of a range, write a Python program to print all negative numbers in given range.
